PROFILE

Dynamic Front-End Developer with over a year of hands-on experience and proficiency in utilizing HTML, CSS, JavaScript, TypeScript, Angular, and an array of cutting-edge tools.

My expertise lies in crafting responsive web experiences that seamlessly merge intuitive user interactions with effective performance optimization, all while maintaining a keen eye for aesthetic detail.

EXPERIENCE

Future Foundry

Outsourcing Website

- Developed a outsourcing platform that connects businesses with vetted developers for various software needs.
- Streamlined communication by providing user-friendly forms for specific services.
- Implemented best practices like clear labeling, high-contrast color schemes, and keyboard navigation.
- Efficiently integrated a clear overview with detailed descriptions about each service that the website has to offer.
- Ensured responsive design that adapts to all screen sizes, ensuring an optimal experience for desktop, laptop, tablet and mobile users.

Hospital CRM

CRUD Application

- Developed a comprehensive CRM system tailored for hospital management, enhancing organizational efficiency.
- Executed CRUD Operations to facilitate adding, editing and deleting doctors and patients with ease.
- Implemented Real-time Updates feature to ensure instant reflection of changes made to patients or doctors.
- Efficiently integrated Firebase for streamlined data management.
- Ensured full responsiveness across various devices, including mobile phones and tablets.
