PROFILE

Dynamic Front-End Developer with hands-on experience and proficiency utilizing HTML, CSS, JavaScript, TypeScript, Angular, and an array of cutting-edge tools.

My expertise lies in crafting responsive web experiences that seamlessly merge intuitive user interactions with effective performance optimization, all while maintaining a keen eye for aesthetic detail.

EXPERIENCE

TechDental

Landing Page

- Created a minimalist, fully responsive landing page using Bootstrap for cross-device compatibility.
- Developed essential sections: navigation, hero, features, about, services, and contact for an intuitive user experience.
- Integrated functional elements like a working contact form and an interactive map to provide easy user interaction.

Future Foundry

Outsourcing Website

- Developed an outsourcing platform connecting businesses with vetted developers for various software needs.
- Streamlined communication with user-friendly forms and clear service descriptions.
- Ensured a responsive design with best practices like clear labeling, high-contrast color schemes, and keyboard navigation.

Hospital CRM

CRUD Application

- Developed a comprehensive CRM system for hospital management, enhancing organizational efficiency.
- Executed CRUD operations for easy management of doctors and patients, with real-time updates.
- Integrated Firebase for streamlined data management and ensured full responsiveness across all devices.
