English

### PROFILE

Dynamic Front-End Developer with hands-on experience and proficiency utilizing HTML, CSS, JavaScript, TypeScript, Angular, and an array of cutting-edge tools.

My expertise lies in crafting responsive web experiences that seamlessly merge intuitive user interactions with effective performance optimization, all while maintaining a keen eye for aesthetic detail.

### EXPERIENCE

#### Finance Dashboard

Personal Finance Management Platform

- Developed a finance management dashboard that allows users to manage finances securely without linking bank accounts.
- Implemented real-time data updates using Firebase, with responsive design for use across all devices.

#### TechDental

Landing Page

- Designed a minimalist, responsive landing page using Bootstrap, including a variety of sections.
- Integrated functional elements such as a working contact form and an interactive map for seamless user interaction.

#### Future Foundry

Outsourcing Services Landing Page

- Created a landing page platform showcasing outsourcing services for businesses, featuring user-friendly forms and clear service infos.
- Ensured responsive design and accessibility through high-contrast color schemes and keyboard navigation.

#### Hospital CRM

CRUD Application

- Developed a CRM system for hospital management, incorporating CRUD operations for doctors and patients, with real-time updates.
- Integrated Firebase for data management and ensured the system was fully responsive across all devices.
